

AIA Phoenix Section Meeting

Tuesday - March 2nd
4:00 p.m.

Join us for a tour of the
Blue Cross Blue Shield Data Center and Office Building
2525 West Townley Avenue in Phoenix
(South of Dunlap, west of 23rd Avenue)

Consisting of a two-story Data Center and a four-story Office Building, this project includes approximately 150,000 SF of interior build-out with a cafeteria, workspaces, computer server rooms, conference and multi-purpose rooms.

A major requirement of these facilities is to allow multiple changes in space configurations in order to accommodate company structure changes, while still provide user-friendly space. A shell building prototype was developed that would maximize space and building efficiencies, while still providing complete staff satisfaction. Staff areas were designed to have plenty of natural day light, access to views, spaces for interaction with colors and finishes that promote well-being and productivity.

Architect: the orcutt | winslow partnership

Attendees will receive 1 AIA learning unit

Tour space is limited.

RSVP required to Diana at 602-252-4200 or diana@aia-arizona.org
